

EVERBLOOM

Year-round nature, warmth, and wellness

for cold climate communities

SCROLL

THE VISION

Your own piece of paradise — whatever the weather outside

Enclosed nature communities give residents the freedom to stroll gardens, tend植物, and breathe fresh air year-round. Think: snow outside, warmth within. Mental health improved by access to green space; food security through community gardens.

MARKET 1

Premium residential — the high-end lifestyle play

Ultra-high-net-worth individuals and families seeking a primary or secondary residence that delivers consistent access to nature, wellness amenities, and a tight-knit curated community. Everbloom commands a price premium aligned with luxury real estate.

MARKET 2

Low-mid luxury — accessible, community-focused

Broadening the Everbloom concept to the aspirational middle class: couples and families who want resort-quality outdoor living without the cost of a freestanding country home. Strong appeal across Scandinavia, Canada, and northern Europe.

MARKET 3

Wellness centres — the B2B play for hotel chains & resorts

Licensing the Everbloom concept to hotel groups, resort developers, and wellness operators who want a guaranteed nature experience regardless of season. Recurring B2B revenue, white-labelable, and fully modular.

MARKET 4

Addictions & recovery — therapeutic enclosed nature

Healthcare operators and addiction treatment networks are actively seeking nature-based therapeutic environments. Municipalities and insurers are funding innovative harm-reduction facilities. Everbloom's enclosed setting is a proven differentiator.

MARKET 5

Retirement communities — serene, premium senior living

An aging demographic demands purpose-built senior living that goes beyond medicalised institutional care. Everbloom's curated green environment supports physical mobility, social connection, and mental wellbeing — the trifecta of healthy aging.

Nature isn't a season. It's a way of life.

Everbloom gives cold-climate communities a new relationship with the outdoors — year-round, accessible, and designed for human wellbeing.
